

St. Edward's Booking System - Reset local storage

When in the booking system press ctrl-shift-I (that's the capital i) to open the developer console. It may need to be done twice. You will see screens like the ones shown below but the may not be the same in every detail

1 Click on Application. to get a screen like this.

2 Click on the arrow next to Local Storage to expand options like this.

3 Click on file://. to get a screen like this.

4 Click on stEdsRouter and then right click to get the context menu.

5 Click on delete

6 Close the developer console Window and hit ctrl-R to re-load the bookings application
